DETAILED ACTION

1. This action is an official response to the amendment received on 04 October 2002. The amendment, which cancelled non-elected claims 13-17 and added claims 18-21, necessitated the following restriction requirement.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - i. the high concentration impurity region is laterally offset from and laterally spaced from the low concentration impurity region in the at least one impurity region the embodiment of claims 1-12, 18);
 - ii a portion of the low concentration impurity region is located under at least a portion of the high concentration impurity region (the embodiment of claim 19);
 - iii. the low concentration impurity region and/or the intermediate concentration impurity region is located between a portion of the substrate, in which neither of the impurity regions are defined, and the high concentration impurity region, so that the high concentration impurity region is not in direct contact with the portion of the substrate in which neither of the impurity regions are defined the embodiment of claim 21).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 20 is generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species (MPEP § 809.02(a)).
5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toniae M. Thomas whose telephone number is (703) 305-7646. The examiner can normally be reached on Monday through Thursday from 8:00 a.m. to 5:00 p.m.
